OUR PURPOSE & MISSION: Easterseals is a leader in building thriving communities by opening doors to support and participation for people with disabilities, Veterans, and families— improving education, advancing health, and increasing employment.

Autism Services

Autism spectrum disorder (ASD) is a neurodevelopmental disorder that begins in early childhood and affects how people interact with others, communicate, learn, and behave. According to the CDC, 1 in 36 children in the U.S. have Autism, up from the previous rate of 1 in 44. 1 in 45 adults in the U.S. have Autism. In the U.S., about 4 in 100 boys and 1 in 100 girls have Autism.

Easterseals is the country's leading provider of services for people with Autism.

We offer services to assess, diagnose, and support children, young adults, and their families who are struggling with understanding and managing behaviors. Effective treatment of the challenging behaviors associated with Autism requires multi-provider involvement, better understanding and support, and focused parental education. The collaboration of all parties involved helps to ensure that the individual's plan of care is consistent across different environments.

For more information or to get started with our autism services, please contact us at 860-270-0600 x100 or clinicalservices@esrec.org

Programs & Services include:

Behavioral Health Therapy & Counseling:

Social services, including counseling and case management, can:

- Link parents and families with resources
- Provide advocacy
- Support emotional identification and regulation

Support Groups

Our therapeutic and support groups provide a safe, welcoming space where individuals can connect with others who share similar experiences. Led by licensed clinicians, groups focus on building coping skills, emotional resilience, and social connection within a supportive environment.

Group topics vary throughout the year and are designed to meet the needs of different age groups and life experiences. Common focus areas include:

- Managing anxiety, stress, or mood changes
- Coping with loss, grief, or major life transitions
- Building social and communication skills
- Enhancing emotional wellness and self-confidence
- Supporting caregivers and family members
- Encouraging connection and belonging

Each group combines discussion, education, and practical skill-building to promote emotional growth and overall well-being.

Early Autism Evaluation (for ages 16-30 months)

- Early identification matters: Detecting autism early can greatly support a child's developmental progress. Easterseals offers comprehensive autism evaluations for children ages 16–30 months.
- Thorough, evidence-based evaluations: Our clinicians use gold-standard diagnostic tools, developmental assessments, and parent interviews to build a complete picture of your child's strengths and needs.
- Advanced technology for clearer insight: Evaluations include EarliPoint™, an FDA-authorized tool that provides objective information about how young children respond to social and visual cues.

Psychological and Neuropsychological Evaluations (ages 4+)

Our psychological and neuropsychological evaluations can assist with:

- Assessment and diagnosis of autism (ASD)
- Identifying individual strengths, learning styles, and support needs to better understand behavior and daily functioning
- Providing personalized recommendations, which may include school accommodations, supportive therapies, and social learning opportunities
